Appendix X. Flying Gable and Widow’s Peaks.

Flying Gable

Rake purlins in one or both end bays will increase in overhanging length from eave to ridge, per dimensions stipulated on building plans.

Example of Widow’s Peak on Gambrel style building

Widow’s Peaks

Similar to Flying Gables, only a small portion of rake purlins will be longer.
Example of Widow’s Peak on Monitor style building

For either of these applications, detail below shows how rake trim will be installed in areas where fly rafter runs at an angle.
